DETAILED ACTION

Page 2

Election/Restrictions

1. Claim 4 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected election, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 23 October 2007.

S'pecification 1

- 2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required. There is an abstract as part of the international application but not an abstract on a separate sheet for this national application.
- 3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.

Application/Control Number: 10/599,910

Art Unit: 3711

(d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.

Page 3

- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Note: There are no section headers and there is not brief description of the several views of the drawings.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 1-3 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite in that it is not the shaft that has an adjustable length the putter has an adjustable length. It appears the only way disclosed to adjust a length is shown in figure 7 where the shaft connection is able to be adjusted in the bore of the head which would be able to adjust the connection point with the shaft and the head. The shaft has a fixed length. Claim 1 is indefinite in that the

Application/Control Number: 10/599,910

Art Unit: 3711

Page 4

shaft does not fold but has an angle. The word folding implies being able to bend a shaft. The shaft appears very rigid and is required to be rigid in order operate. Claim 1 is indefinite in that the statement "A golf club, of the so called putter type" is indefinite. It is uncertain what is meant by the words "of the so called". The Examiner recommends amending the claim to read -- A putter golf club comprising -- to removed this rejection. Claim 5 is indefinite in that the claim refers to figures 1 and 2. Referring to drawings in not allowed in claims since it is uncertain what the limits of the claim is. It makes the claim indefinite. Claim 1 recites the limitations "the first hole", "the first portion", "the upper angle portion", "the grip", "the internal sphere". There is insufficient antecedent basis for these limitations in the claim. Claim 2 recites the limitations "the symmetrical internal slots". Claim 3 recites the limitations "the center". There is insufficient antecedent antecedent basis for these limitations in the claims.

Allowable Subject Matter

6. Claims 1-3 and 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. None of the prior art discloses or renders as obvious a cylindrical head with a vertical hole placed in the middle, a shaft inserted in the vertical hole, a shaft having an angle relative to a first vertical portion, an upper angled portion with an end parallel to the ground, and said end supporting a grip formed by two spheres of different diameter in addition to the other elements of structure claimed.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen L. Blau whose telephone number is (571) 272-4406. The examiner can normally be reached on Mon - Fri 10:00 AM - 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eugene Kim can be reached on (571) 272-4463. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
